

Sequence PAL v2

Images

- Anchor image: latest user-approved scene only

Positives

- same woman
- same face
- same age-reading
- same costume state
- same background state
- same emotional baseline
- same illustration mode
- sequence starts only from user-approved anchor
- immediate continuation
- same moment, next beat feeling
- very small change only
- subtle change only
- restrained motion scale
- one change scope at a time

Negatives

- no sequence start from unapproved image
- no sequence start from failed image
- no implicit anchor replacement
- no drifted frame reuse as anchor
- no large pose jump
- no sudden profile shift
- no cinematic emotional leap
- no cut-like discontinuity
- no gaze + hand + expression large change at once
- no identity drift
- no expression drift into cheerful smile
- no gesture drift into theatrical pose
- no cumulative drift
- fail output does not carry over

Scene Step Defaults

- Scene 2: gaze only
- Scene 3: hand position only
- Scene 4: expression only
- hair motion, if any, is secondary only
